RemitClear

REMITCLEAR ENTERPRISE

remitclear.com/enterprise

Cash application for every company in your group

RemitClear reads the remittance advices your customers send, as PDFs, scans, spreadsheets or email text, matches every line against the open invoices in the right company and, once it's approved, posts the payment into your ledger. We set it up to post the way your team works today, with every company under one login.

WHO IT'S FOR

- **Groups running several companies** under one finance team, from a group built through acquisitions to a shared service centre.
- **Businesses on an ERP**, or moving onto one, who want remittances posted into it the way they post today.

THE ERPS WE POST INTO

Dynamics 365 Business Central
Customer payments applied to the open invoices and credit memos the remittance lists, posted the way your team records receipts today.

Intuit Enterprise Suite
Customer payments applied in the entity that holds the invoices, with every entity under one login.

HOW A ROLLOUT RUNS

1. **A call and your quote.** Send us one or two of your remittances first and we'll show you how RemitClear reads and matches them. You'll have your price before the call ends, and a short written summary after it.
2. **Your first company goes live.** We connect your ledger, set RemitClear up to post the way your team works, and take your first company live with you.
3. **Then the rest of the group.** Each company after that gets its own go-live and joins the same agreement, at whatever pace suits your team.

WHAT EVERY AGREEMENT INCLUDES

- ✓ **Each company connected and set up to how you post today.** We connect each company's ledger or ERP and post receipts the way your team records them.
- ✓ **Every company under one login.** Each company keeps its own remittances and forwarding address.
- ✓ **Onboarding for your team.** We take the people who'll use it through RemitClear on your own remittances.
- ✓ **A go-live for each company.** Each company goes live on a call with us, at a pace that suits your team.
- ✓ **Same-day changes.** Ask for a change to how RemitClear matches or posts and we'll make it the same day.
- ✓ **A named contact.** One person who knows your setup and answers your team directly.
- ✓ **A security pack.** Our security documentation, ready for your IT and procurement teams.
- ✓ **Regular check-ins.** We review how it's going with your finance team, most often in the first few months.

SECURITY

- Connects through access your admin approves, so nobody shares a password.
- Each company's data is kept separate, and encrypted in transit and at rest.
- Every payment RemitClear posts is logged, with the original remittance kept against it.
- Passed Intuit's app security review in November 2026, including a penetration test by an independent security firm. More at remitclear.com/security.

PRICING

Each company is priced separately and agreed with you on a call, and the more companies you bring, the less each one costs. No setup fee. Unlimited users.

NEXT STEP

Get a quote

A 30-minute call: send one or two remittances first if you like, and you'll have your price before it ends.
